

COMING SOON
Smart 1-Line™
HMI COMPUTER

A complete modern solution for monitoring your AC-PRO® and/or AC-PRO-II® networks at one convenient location

The Smart 1-Line™ provides

- ❑ Turn-key monitoring solution designed for AC-PRO® & AC-PRO-II®
- ❑ Based on a rugged industrial computer with solid-state drive and no cooling fans
- ❑ Includes designer mode and run-time mode
- ❑ High resolution color touch screen
- ❑ Document, store, and access all of your breaker data at one location using built-in software for: Settings, Time Current Curves, Trip History, Waveforms*, and more.
- ❑ Includes software for full Modbus communications capabilities
- ❑ Field configurable to match 1-Line drawing
- ❑ Display one line diagrams, waveforms*, alarms, currents, power, energy, breaker open/close status, and more.
- ❑ RS-485 communications to AC-PRO® & AC-PRO-II® Trip Units
- ❑ Designed to be installed in a switchgear or control room
- ❑ Determine substation status at a glance
- ❑ Can be configured for remote breaker trip
- ❑ More features will be added in the future

AC-PRO-II with updated firmware required to view waveforms
